

SPANISH FOR HEALTH PROFESSIONALS VIDEO SERIES

The design for this video is based on 25 years of successfully using video to teach job-related Spanish to health practitioners. SPANISH FOR HEALTH PROFESSIONALS offers the viewer 65 practical commands and phrases that allow the health professional to carry out, with a very limited vocabulary, professional procedures and duties with Spanish speaking patients. The focus is on providing commands and phrases that elicit short direct answers rather than long and complicated explanations. For example, rather than teaching the phrase, "what 's the problem?", the viewer learns how to say, "show me with your finger where you have a problem." The objective is to allow the health professional to be in control of professional situations even with minimum language skills.

CONTENTS OF THE PROGRAM
